# Demo: JS Keycode

Inside your index.html, type the following:

```
<h1>Keycode Generator</h1>
<input type = "text" onkeypress = "keycode()">
<p id="keycode">Keycode</p>

<script src="app.js"></script>
```

# app.js

```
function keycode(){
        var key = event.keyCode;
        console.log(key);
}
```

This will generate the key and display in console when a key is pressed in the input.

# Task: Keycode generator

{ CN }™

When a key is pressed,

The browser should show:

- event.key

- event.code

- event.which

72

*event.key*  *event.code*  *event.which*

h  KeyH  72

Press a key to see the event keycode

72

| event.key | event.code | event.which |
|-----------|------------|-------------|
| h | KeyH | 72 |
